Refurbishment | 10 weeks | DACH region

Refurbishment turnaround cut in half across two depots

A regional operator replaced an ad-hoc repair process with a standardised intake-to-return workflow, consolidated spare parts across two depots and cut average refurbishment turnaround from 11 days to 5, with no added headcount.

11 → 5 days

Average refurbishment turnaround, before vs. after

Client name, location and figures withheld under NDA. More detail available on request during a call.
